🔴	A video plays longer than 5 seconds, without a way to pause it. Remove the `autoplay` attribute, or add a `controls` attribute to the video, or use a pause control with an `aria-controls` attribute referencing the video.	WCAG 2.1 A 2.2.2 Section 508 (2017) A 2.2.2	3 pages
	https://www.superfeet.com/pages/careers	Line 2778	
	https://www.superfeet.com/pages/new-product-releases	Line 2777 2780 2782	
	https://www.superfeet.com/pages/personalized-fit	Line 3235	
🔴	`alt` text should not contain placeholders like 'picture' or 'spacer'. For purely decorative images and spacers use `alt=''`, for images of text use the text, and for other images use a description of the image. Impact on users: • JAWS : Reads out placeholder text, instead of a useful image description. • NVDA : Reads out placeholder text, instead of a useful image description. • VoiceOver : Reads out placeholder text, instead of a useful image description.	WCAG 2.1 A F30 Section 508 (2017) A F30 1.1.1 1.2.1	1 pages
	`alt='image'` https://www.superfeet.com/	Line 7912	
🔴	An element with a `role` that hides child elements contains focusable child elements.	WCAG 2.1 A 4.1.2 Section 508 (2017) A 4.1.2 ARIA 1.2 Presentational Children	94 pages

Priority	Description and URL	Guideline and Line#	Count
	This element's role marks child elements as presentational, which hides them from the accessibility tree, but some of these children are focusable, so they can be navigated to, but are not voiced in a screen reader. The role may either be specified by the role attribute or the implicit role based on the element. For example, a elements have an implicit role of link.

	Identify row and column headers in data tables using `th` elements, and mark layout tables with `role=presentation`. Data tables allow screen reader users to understand column and row relationships. Layout tables read cells as a series of unrelated paragraphs with no tabular structure. Without `th` or `role`, screen readers apply heuristics to decide whether a table is a layout table or data table. These heuristics vary greatly between screen readers, and are affected by browser being used, window size, and font size (so the outcome is very unpredictable without `th` or `role`). If a data table has headers marked up using `td`, then change these to `th`. If a data table has no headers, add `th` elements	WCAG 2.1 A F91 Section 508 (2017) A F91 1.3.1	4 pages

Priority	Description and URL	Guideline and Line#	Count
	describing each row and/or column. If the table is only used for layout add `role=presentation` to the `table` element. Impact on users: • JAWS Reading: Treats tables without `th` and `role` as layout tables if the table contains cells above or below certain pixel sizes. This measurement is affected by browser window size, browser font size, and the browser used. • NVDA Reading: Applies a layout table heuristic to tables without `th` and `role` which varies depending on the browser used and on the window size in some circumstances. • VoiceOver Reading: Uses a sophisticated heuristic on tables without `th` and `role`, which is similar (but not identical) to the heuristic used by NVDA with Firefox.

	Link uses general text like 'Click Here' with no surrounding text explaining link purpose.	WCAG 2.1 A F63 Section 508 (2017) A F63	17 pages
	Screen reader users use text around links to help understand what the link does. If the link text is very general, and there's no surrounding text, there's no way to work out what the link does. Either use a descriptive link label (which helps all users) or add an aria-label or aria-describedby to the link (which helps screen reader users).	2.4.4 2.4.9

	Links must have an accessible name. A link name allows screen readers to voice what the links does. If there is no link content, or the link content is hidden by CSS, screen readers have nothing to read, so read out the URL instead. To add a name do one of the following: • Add text between the a element start and end tags • Add an aria-label attribute • Add an aria-labelledby attribute • Add an img alt attribute labeling the link if it contains an img element **Note:** img elements with display:none or visibility:hidden are not included in the link's accessible name. Some lazy loader scripts hide images until they scroll into view, but screen readers can voice links below the fold (via the List Links command) resulting in reading links with no name. img elements with role=presentation or role=none are not included in the link's accessible name. 	The CSS outline or border style on this element makes it difficult or impossible to see the link focus outline. Do not remove the default outline style, and change any border styles to avoid obscuring the focus outline around focusable elements. See :focus-visible for more information. Using a border or outline style that obscures the focus ring causes problems for keyboard-only users in: • Chrome (obscures the focus indicator on links, buttons, dropdowns and range controls) • Firefox (obscures the focus indicator on links) • Internet Explorer (obscures the focus indicator on links, buttons and range controls)	WCAG 2.1 AA F78 Section 508 (2017) AA F78 2.4.7	16 pages

	Avoid specifying a new window as the target of a link with target=_blank.	WCAG 2.1 AAA F22	71 pages
	Displaying new windows without warning can be very confusing to non-sighted and mobile users. Some screen readers and mobile devices give very little indication a new tab or window has opened. If you cannot avoid displaying a new window, insert an "opens in a new window" warning into the link text or add the warning to the link using a title attribute or aria-describedby attribute.	3.2.5

	Don't use CSS animations or transitions in interactions without giving the user a way to turn them off. Use the `@media (prefers-reduced-motion)` media query to respect user preferences.	WCAG 2.1 2.3.3	1 pages
	`:hover transition: width 0.300000s` `:hover transition: width 0.300000s` `:hover transition: width 0.300000s` `:hover transition: width 0.300000s` https://www.superfeet.com/	Line 7204 7205 7206 7207	
	Ensure that text and background colors have a 7:1 contrast ratio. Some users find it hard to read light gray text on a white background, dark gray text on a black background and white text on a red background. • The contrast ratio should be 4.5 or more for 18 point text, or larger • The contrast ratio should be 4.5 or more for 14 point bold text, or larger • The contrast ratio should be 7.0 or more for all other text	WCAG 2.1 AAA 1.4.6	1 pages
	The text color to background color contrast ratio after composition is: **3.20** with `color: rgb(0,146,255);` `background: rgb(255,255,255);` `font-size: 14.40pt;` `font-weight: 700;` https://www.superfeet.com/pages/ccpa-privacy-policy	Line 2752	
	Link uses general text like 'Click Here' which doesn't explain link purpose.	WCAG 2.1 AAA F84	26 pages
	Screen reader users often tab from one link to the next, or use the 'Next Link' command. Moving between links labelled 'click here' sounds like 'Click here, tab, click here, tab, click here'. Change the link text, or add an `aria-label`, so the link makes sense when read without the surrounding text.	2.4.9
